

Milan, 24th February 2010

Dear Host Family,

My name is Sonia, and I'm 17. I live in Italy, in Milan.

I have a younger brother, and I often argue with him, but actually we love each other.

I'm attending the fourth year of a scientific high school, and I would like to study engineering or chemistry at the university. In fact, my favourite subjects are maths and chemistry (on the contrary, I don't enjoy latin that much).

Besides school, I've got many other interests, for example, I like reading, I love playing the piano (though I'm not that good at it), travelling, and, of course, going out with friends!

However, my biggest passion is karate. I practice this sport since I was 11, and I'm absolutely fond of it. At the moment I'm brown belt, but I hope to do the exam for the black belt by the end of this year.

Well...what else? I'm really looking forward to go to America, since I've never been there (but my friends always told me it was a beautiful country), and of course to meet you!!

Love,

Sonia
